Professional Summary

Principal Consultant / AI Cloud Architect with 20+ years of experience in AWS Cloud, Generative AI, Python automation, Data Engineering, and enterprise-scale AI platforms. Proven expertise in designing and deploying scalable AI/ML solutions using Amazon Web Services (AWS) services such as AWS Bedrock, serverless architectures, and agentic AI workflows.

Strong experience in Python development, AI orchestration, LLM observability, token usage monitoring, FinOps-driven cloud cost optimization, and enterprise logging pipelines. Skilled in implementing monitoring and alerting solutions using Amazon CloudWatch, AWS Lambda, Grafana, and Prometheus for AI workloads and distributed systems.

Hands-on experience with Generative AI, LangChain, CrewAI, Retrieval-Augmented Generation (RAG) pipelines, API integrations, prompt engineering, and cloud automation across AWS environments.

Core Skills

Generative AI & Agentic AI

AWS Bedrock, Agentic AI Workflows, Multi-Agent Systems, LangChain, LangGraph, CrewAI, RAG Architecture, OpenAI, Gemini, Hugging Face

AWS/Azure/GCP Cloud & AI Infrastructure

AWS CloudWatch, AWS S3, AWS SageMaker, IAM, Serverless AI Architecture, Azure OpenAI Service, Vertex AI, Semantic Kernel, AutoGen, Prompt Engineering, Vector Databases, Azure AI Search, Gemini API, AKS, GKE, Docker, Kubernetes, Terraform, MLOps, AI Governance

Programming & Automation

Python, REST API Integration, JSON Processing, Webhook Automation, FastAPI

DevOps & MLOps

Docker, GitHub Actions, GitLab CI/CD, Terraform, Ansible

Data Engineering

Airflow, PostgreSQL, IBM DataStage, CloverDX

Professional Experience

Principal Consultant / AI Architect

AgenticAI Lab | Apr 2025 – Present

- Designed and orchestrated AI agent workflows using AWS Bedrock, LangChain, CrewAI, and multi-agent architectures.
- Built Python-based automation solutions for AI orchestration, workflow management, and API integrations.
- Developed observability pipelines for monitoring LLM usage, token consumption, AI latency, and operational metrics.
- Implemented logging and alerting frameworks using AWS CloudWatch, SNS, EventBridge, Lambda, Grafana, and Prometheus.
- Built monitoring dashboards for AI workload health, cloud utilization, and anomaly detection.
- Optimized AI infrastructure cost through AWS billing analysis, token usage monitoring, and FinOps practices.
- Developed production-grade Python scripts and APIs for enterprise AI integrations and cloud automation.
- Worked with enterprise integration and middleware logs for distributed system monitoring and operational analytics.

Environment:

AWS Bedrock, Python, LangChain, CrewAI, CloudWatch, SNS, EventBridge, Lambda, Grafana, Prometheus, FastAPI, Docker, Kubernetes

Senior Consultant / Specialist

Eviden (Atos) / Syntel Ltd. | Feb 2015 – Apr 2025

- Designed and orchestrated AI agent workflows using n8n, Zapier, Make, AWS Bedrock, LangChain, CrewAI, and multi-agent architectures.
- Led implementation of AI/ML and cloud-native data engineering solutions across AWS environments.
- Designed scalable Python-based ETL, automation, and AI integration pipelines.
- Built enterprise monitoring and observability frameworks using CloudWatch, Grafana, and Prometheus.
- Worked extensively on log aggregation, ETL monitoring, API monitoring, and operational analytics.
- Developed AI-enabled automation workflows integrating enterprise platforms and cloud services.
- Collaborated with cross-functional teams for deployment of cloud-native AI and analytics solutions.

Environment:

AWS, Python, AWS S3, Glue, Airflow, PySpark, Grafana, Prometheus, Docker, Kubernetes, CP4D, DataStage

Senior Consultant

Capgemini India | Mar 2013 – Feb 2015

- Developed enterprise data engineering and analytics solutions for banking clients.
- Built Python-based ETL and automation workflows.
- Implemented scalable data pipelines and operational reporting systems.

Technical Lead

Wipro Technologies | Apr 2011 – Mar 2013

- Led enterprise data integration and analytics initiatives for banking customers.
- Developed ETL frameworks and optimized enterprise reporting pipelines.

System Analyst

Atos Origin India | Aug 2007 – Apr 2011

- Designed telecom and retail data systems; improved DWH and customer analytics.

IT Engineer

CMC Ltd. / TCS | Jun 2005 – Aug 2007

- Developed tax and enterprise systems; involved in Oracle Apps upgrades and Java-based portal development.

Key Projects

AI Agentic Workflow & AWS Bedrock Automation Platform

AgenticAI Lab | 2025 – Present

- Designed AI orchestration workflows using AWS Bedrock and multi-agent AI frameworks.
- Developed Python-based automation services for AI workflow execution and API integrations.
- Implemented LLM monitoring pipelines for token tracking, observability, and anomaly detection.
- Configured CloudWatch alerts, SNS notifications, EventBridge triggers, and Grafana dashboards for AI operations monitoring.
- Built FinOps dashboards for AWS AI billing analysis and token consumption optimization.

Technologies:

AWS Bedrock, Python, CloudWatch, SNS, EventBridge, Lambda, Grafana, LangChain, CrewAI, FastAPI

Data Platform Migration – Credit One Bank

Jan 2025 – Present

- Architected scalable AWS cloud data pipelines for enterprise financial analytics.
- Automated ETL and operational workflows using Python, Airflow, and AWS services.
- Implemented monitoring dashboards and operational logging pipelines for enterprise data processing.

Technologies:

AWS S3, Python, PySpark, Airflow, Snowflake, Hive, GitLab CI/CD

Market Data Analysis – Moody's Analytics

Jul 2024 – Jan 2025

- Developed AWS-based market data ingestion and analytics platform.
- Built Python automation workflows and predictive analytics pipelines.
- Integrated external APIs and enterprise data sources for financial analytics.

Technologies:

AWS Cloud, Python, PySpark, PostgreSQL, CloverDX

Toyota Connected Car Cloud (Toyota TCCC) - Toyota Motor Engineering

Oct 2023 – Jul 2024

- Worked on Toyota Connected Car Cloud (TCCC), an automotive cloud solution bundle with real-time data flow, data storage, data management, and artificial intelligence services.
- Contributed to EV Charging Management using Machine Learning for intelligent charging optimization and monitoring.
- Developed Speech Emotion Recognition models using Deep Learning to analyze and detect driver emotions from speech data.
- Worked on Intoxication Detection using Deep Learning to identify driver intoxication levels and improve vehicle safety systems.

Technologies:

CP4D, AWS Cloud, AI/ML, MLOps, Data Science, Gen AI, Mendix Low-Code and more.

Metrics and Reporting System (Opel - MARS) - Groupe PSA

Feb 2019 – Oct 2023

- Worked with Groupe PSA, a leading automotive manufacturer known for producing cars and motorcycles under brands such as Peugeot, Citroën, DS, Opel, and Vauxhall.
- Contributed to projects associated with the Peugeot brand, PSA's primary marque and one of the leading automotive brands in Europe and global markets.

Technologies:

ETL, DWH, IBM DataStage/CP4D, AI/ML, MLOps, Data Science, Gen AI and more.

Charles River IMS (Raniera-F8 coin) - State Street Global Advisors

Nov 2017 – Feb 2019

- Worked on Charles River Investment Management Solution (Charles River IMS), a specialized platform designed to automate front-office and middle-office operations for buy-side firms.
- Supported solutions used by investment management companies across 40+ countries, including 50 of the world's top 100 investment management firms.
- Contributed to enhancing operational efficiency, workflow automation, and investment management processes within the Charles River IMS platform.

Technologies:

IBM DataStage 9.1, OutSystems, Python, PL/SQL, Linux, SQL.

ERM Credit Risk Repository (ERM-CRR-RDR) - State Street Corporation

Apr 2016 – Nov 2017

- Worked on the development of the New Data Warehouse (NDW), designed to establish a unified data structure for all credit risk-related data and associated business processes.
- Contributed to enabling comparison and analysis of credit, capital, and stress-related exposure and limit values through the centralized data framework.
- Supported effective utilization of risk information available in the Risk Data Repository (RDR) on a daily basis for improved risk management and reporting.

Technologies:

IBM DataStage 9.1, Python, PySpark, PL/SQL.

Operational Security Framework (OSF-RV FACETS) - United Health Group

Sep 2015 – Apr 2016

- Worked on the Operational Security Framework (OSF), aimed at simplifying and standardizing the remediation of enterprise security gaps.
- Contributed to building a repeatable process for continuous identification, tracking, and remediation of security vulnerabilities.
- Supported initiatives focused on reducing organizational security risks through structured and proactive security improvement processes.

Technologies:

IBM DataStage 9.1, PL/SQL, Linux, Control-m, and more.

Consumer Relevant Merchant Data Mart (CRMDM) - American Express

Feb 2015 – Sep 2015

- Worked with American Express, a leading global financial services company known for its credit card and charge card businesses.

- Contributed to the CRMDM platform for maintaining merchant-related non-financial information and associated business data.
- Supported data management and maintenance processes to ensure accurate and reliable merchant information across business systems.

Technologies:

IBM DataStage 9.1, Appian, Python, PL/SQL, Linux, SQL Navigator, Putty, WinSCP, and Citrix.

Global Banking Project EOS - HSBC Holdings PLC

April 2013 – Feb 2015

- Worked on EOS, a credit portfolio management platform designed to provide a granular product-level view of credit portfolio risk across global markets.
- Contributed to analyzing each credit product's impact on the organization's global credit portfolio risk and performance metrics.
- Supported the implementation of risk-adjusted profitability measures, including Shareholder Value Added (SVA) and Return on Equity (ROE), for enhanced financial and risk analysis.

Technologies:

IBM DataStage 9.1, Python, PL/SQL, Linux, SQL Navigator, Putty, WinSCP, and Citrix.

Efficiency Management - Leading Investment Bank of Switzerland

Aug 2012 – Apr 2013

- Worked on the MIW Supplier Management solution, originally implemented using the PeopleSoft platform for supplier and supplier parent maintenance.
- Contributed to enhancing supplier data management processes with improved usability and maintenance workflows.
- Supported optimization of filtering, record visibility, and data editing capabilities to improve operational efficiency and user experience.

Technologies:

IBM DataStage 9.1(Designer, Director, Manager, and Administrator), PL/SQL, Oracle9i, HP-UNIX 11.11, Toad 9.0.1.8, Putty, FileZilla, and Citrix.

EPM - Core Financials - Leading Investment Bank of Switzerland

Dec 2011 – Aug 2012

- Worked on the MI Warehouse platform based in Princeton, supporting Enterprise Performance Management (EPM) data warehousing functionalities.
- Contributed to the Multi-Dimensional Warehouse (MDW) framework utilizing Princeton GL data along with multiple source systems.
- Supported data integration, warehousing, and reporting processes to enable efficient enterprise data analysis and management.

Technologies:

IBM Data Stage 8.5(Designer, Director, Manager, and Administrator), PL/SQL, Oracle9i, HP-UNIX 11.11, Toad 9.0.1.8, Putty, FileZilla, and Citrix.

Genesis-Retail Deposits - CITIBANK, N.A.

Jun 2011 – Dec 2011

- Worked on the GENESIS program, designed to establish a centralized solution for managing contracts, positions, and customer account balances across Citigroup on an enterprise-wide basis.
- Contributed to building a common data model incorporating reference data aligned with Enterprise Data Standards and financial data anchoring.
- Supported data integration and standardization efforts to enable consistent, accurate, and unified financial and customer data management across the organization.

Technologies:

DataStage 9.1, AIX-UNIX, Teradata, Oracle10g, Putty, FileZilla, Citrix.

ITO ACES (Asia Consumer Enterprise Solution) - CITIBANK, N. A.

Apr 2011 – Jun 2011

- Delivered daily business performance reporting across 15 AP countries, covering multiple products, customer segments, and sales hierarchies.
- Generated and maintained key performance indicators (KPIs) to monitor business progress on a daily basis.
- Enabled analysis of business trends and variances against planned targets to support data-driven decision-making and performance tracking.

Technologies:

AIX-UNIX; PL/SQL, RDBMS: Oracle10g, DataStage 8.5, Toad 9.0.1.8, Putty, FileZilla, and Citrix.

Obelix OBX / Assurancetourix ATX - SFR France

Jun 2009 – Apr 2011

- Worked on optimizing data synchronization processes from ORIAN to the CLARIFY database (SAFIR 1.5) and SAP RMCA systems.
- Contributed to improving data flow efficiency and consistency across multiple integrated platforms.
- Supported interoperability between SSA (Sub-System Applications) such as OBELIX and ASSURANCETOURIX, which interact with multiple SSAs using different data models across varied infrastructure environments.

Technologies:

Data Stage 7.5.2 (Manager, Designer, Director, Administrator), HP-UNIX 11.11, PL/SQL, Oracle9i, Toad 9.0.1.8, Putty, FileZilla, and VPN Client 4.8.01.

Neckermann DWH (KQ) - Neckermann, German

Aug 2007 – Jun 2009

- Worked with Neckermann, one of the largest mail-order companies in Europe with subsidiaries across multiple countries including the Netherlands, Belgium, France, Denmark, Austria, and Eastern Europe.
- Contributed to the Neckermann CRM Data Warehouse designed for query and analytical purposes to enhance mail-order business performance.
- Supported data management and reporting capabilities to improve customer insights and business decision-making within the CRM data warehouse system.

Technologies:

Data Stage 7.5.2 (Manager, Designer, Director, Administrator), HP-UNIX 11.11, PL/SQL, Oracle8i, Toad 9.0.1.8, Putty, FileZilla, and VPN Client 4.8.01

Ultimatix - Oracle Upgrade - Tata Consultancy Services

Nov 2006 – Aug 2007

- Worked on Ultimatix Oracle Upgrade project for Tata Consultancy Services, focusing on upgrading Oracle Applications from version 11.5.5 to 11.5.10.2.
- Contributed to enhancing system stability, performance, and functionality through the Oracle application upgrade process.
- Supported extension of Oracle Project Management using the Oracle Applications Framework (OA Framework) to improve project management capabilities and user experience.

Technologies:

HP-UNIX 11.11, PL/SQL, Java, Oracle Apps 11.5.10.2, PL/SQL Developer, Jdeveloper with OA extensions, Oracle Forms, Edit Plus

DVAT, (Delhi Value Added Tax) - Delhi Sales Tax, NCT, New Delhi

Jun 2005 – Nov 2006

- Worked on DVAT, a web-based application developed for the Delhi Sales Tax department under the VAT regime.
- Contributed to building an intranet and internet-based system enabling dealers to apply online for registration and file tax returns through the web.
- Supported development of digital tax processing workflows to improve accessibility, efficiency, and transparency in tax administration.

Technologies:

Java, JSP, Servlet, JDBC, Java Script, Windows 2000, Oracle 9i, Jdeveloper, SQL Developer

Certifications

- AWS Certified Solutions Architect – In Progress
 - Apache Airflow – Udemy (2025)
 - Cloud Engineering (AWS, Azure, GCP) – Atos
 - Machine Learning with TensorFlow – Udemy
 - Cognitive Solutions AI & ML – Atos
-

Education

Master of Computer Applications (MCA)

- Galgotias Institute of Management & Technology, Noida

Master of Science (M.Sc.) – Mathematics

- Deen Dayal Upadhyay University, Gorakhpur

Bachelor of Science (B.Sc.)

- Mathematics & Chemistry
